S.VIGNESHKUMAR

POWER BI DEVELOPER

+91 63813 84655 | vikkivk3060@gmail.com | Chennai, Tamil Nadu

EXECUTIVE SUMMARY

Results-driven Power BI Developer with 5+ years of experience in Business Intelligence, Data Visualization, SQL development, and Dashboard Automation. Experienced in designing enterprise-level dashboards using Power BI, Tableau, SQL Server, Oracle Database, DAX, Power Query, and Tableau Prep. Skilled in data modeling, ETL development, KPI reporting, report optimization, and transforming complex datasets into meaningful business insights. Strong ability to collaborate with stakeholders to deliver scalable reporting solutions that improve operational efficiency and business decision-making.

TECHNICAL SKILLS

- Power BI Desktop
- Power Bi Service
- Tableau Desktop & Server
- DAX Calculation
- Data Modeling
- Data Visualization
- ETL - Data load
- SQL Server
- SQL Queries
- Dashboard Development
- Power automate

PROFESSIONAL EXPERIENCE

Business Intelligence Developer **July 2021 – Present**

Glibware Soft Solutions, Chennai

- Designed, developed, and maintained enterprise-level Power BI dashboards and reports to support Sales, Finance, Banking, Operations, and Executive Management reporting.
- Collaborated with business stakeholders, product owners, and functional teams to gather reporting requirements and translate business needs into interactive BI solutions.
- Designed scalable data models using Star Schema and Snowflake Schema methodologies to improve report performance and maintainability.
- Connected Power BI to multiple data sources, including SQL Server, Oracle Database, Excel, CSV, SharePoint, and REST APIs.
- Developed reusable semantic models and centralized datasets to enable self-service reporting across business units.
- Built robust ETL processes using Power Query (M Language) to extract, cleanse, transform, merge, append, and standardize data from multiple systems.
- Created advanced DAX measures and calculated columns using functions such as CALCULATE, FILTER, ALL, VALUES, RELATED, SUMX, RANKX, SWITCH, USERELATIONSHIP, and TIME INTELLIGENCE functions.
- Developed business KPIs including Revenue, Profit, Gross Margin, Sales Growth, Customer Retention, Loan Performance, Branch Performance, Collection Efficiency, and Operational Metrics.
- Implemented Time Intelligence calculations such as YTD, QTD, MTD, Previous Year Comparison, YoY Growth, Rolling 12 Months, Running Totals, CAGR, Moving Average, and Forecast Analysis.
- Designed highly interactive dashboards using slicers, bookmarks, drill-through, drill-down, navigation buttons, tooltips, field parameters, and dynamic titles.

Project 1: Banking Business Intelligence Dashboard
Client: Citibank
Environment: Power BI, SQL Server, Oracle, DAX, Power Query
Project Description:
Developed interactive dashboards to monitor banking operations, customer performance, loans, deposits, and branch profitability. Delivered actionable insights through real-time reporting and KPI tracking.
Responsibilities:

- Designed and implemented Star Schema data models for reporting.
- Developed ETL processes using Power Query to cleanse and transform data.
- Created DAX measures for YTD, MTD, QTD, Growth %, and business KPIs.
- Developed interactive dashboards with drill-through, bookmarks, slicers, and dynamic filters.
- Wrote optimized SQL queries, views, stored procedures, and functions.
- Implemented Row-Level Security (RLS) and scheduled dataset refreshes.
- Optimized report performance by improving DAX calculations and data models.
- Collaborated with stakeholders to gather business requirements and deliver reporting solutions
- Participated in the migration of reporting solutions from legacy systems to Snowflake and Power BI, improving data accessibility and reporting capabilities.

Project 2: Retail Sales Analytics Dashboard
Client: Macy's
Environment: Power BI, Tableau, Oracle, SQL Server
Project Description:
Developed sales and inventory dashboards to analyze revenue, product performance, regional sales, and customer trends, enabling business users to make data-driven decisions.
Responsibilities:

- Built interactive Power BI and Tableau dashboards for sales and inventory reporting.
- Developed Power Query transformations to integrate data from multiple sources.
- Created DAX measures for Sales, Profit, Margin, YoY Growth, and Inventory KPIs.
- Designed drill-down reports, KPI cards, and dynamic visualizations.
- Published dashboards to Power BI Service and Tableau Server.
- Implemented Row-Level Security (RLS) and access controls.
- Optimized SQL queries and improved dashboard performance.
- Worked with business users to gather requirements and deliver analytical reports.

Project 3: Healthcare Analytics Dashboard
Client: Humana
Environment: Power BI, SQL Server, Oracle, DAX
Project Description:
Developed healthcare analytics dashboards to monitor patient outcomes, claims, provider performance, and operational KPIs, supporting data-driven healthcare management.
Responsibilities:

- Designed interactive dashboards for patient, claims, and provider analytics.
- Developed ETL processes using Power Query to prepare healthcare data.
- Created DAX measures for patient metrics, readmission rates, and operational KPIs.
- Built drill-through reports with dynamic filters and KPI scorecards.
- Performed data validation and ensured report accuracy.
- Implemented Row-Level Security (RLS) and scheduled data refreshes.
- Optimized SQL queries and Power BI reports for improved performance.
- Collaborated with business stakeholders to deliver healthcare reporting solutions.

EDUCATION

Bachelor of Commerce (Computer Applications) **2017 – 2020**
Sri Krishna Adithya College of Arts and Science, Coimbatore
